Specialty: **Vietnamese Linguistics**

Classification: **62 22 01 02**

Name of PhD Student: **Dang Van Binh**

Supervisors: **1. Assoc. Prof. Doan Van Phuc, Ph.D**

2. Assoc. Prof. Nguyen Thi Luong, Ph.D

Institution: Hanoi National University of Education

New conclusions

The dissertation investigates deeply and figures out the principle characteristics of Mnong given names from the perspectives: structure, naming bases and meanings; use of given name in association with Mnong culture in communication, towards the consistence in writing Mnong given names, contributing to the state agencies' ease in their civil administration. Thefore, the dissertation just proposes several scientific principles, aims, and principal orientations in the writing of Mnong given names (within the scope of research), to contribute to the standardization of ethnic people's names in Vietnamese.

Compared to other linguistic phenomena, Mnong given names are highly social linguistic signals.

Further research: Investigating proper measures to retain the primary giving and calling of the original Mnong family names to preserve the values of Mnong language and culture.
