New conclusions

Contributions to the finalization and development of preschool management human resource toward standardization have been made.

Status of preschool principals has been recognized. Development of preschool principals in Northern provinces toward standardization has been promoted.

Professional competence framework of preschool principals has been specified to adapt with the context of Northern provinces. Six solutions for development of preschool principals toward standardization have been recommended and proved with their necessity and positive influence. The proposed solutions are scientific and effective in the improvement of preschool principals. If they are applied properly, they will help enhance the quality of the preschool principals and thus improve the education quality.

The study results can be used as a good reference for researchers, managers, education and training institutions specialized for preschool managers.
